

Which arms each encoder actually learns — 44 arms, 651 held-out sims, error bars = sd over training seeds

dashed line = that encoder's mean over the 44 arms · seeds: ArmToken-NPE 3 · CloneAtt-NPE 2 · CloneMLP-NPE 3 · DominantClone-NPE 3

Spearman ρ of per-arm R^2 with chromosome number: ArmToken-NPE +0.72 · CloneAtt-NPE +0.52 · CloneMLP-NPE +0.65 · DominantClone-NPE -0.81
